

Roman Shade Supply List

Roman Shades can be made to fit inside the window frame or be the same size as the frame. You will need to measure your window for the size of the FINISHED shade.

- **For a shade to fit inside the frame**

Measure the length and width of the window, either inside the frame:

- Length—top of the window to sill
- Width—side to side

- **For a shade to fit outside the frame**

Measure the length and width of the sill and frame

- Length – Top of frame to sill,
- Width – outer edge of frame across to outer edge of frame.

Buying Fabric –

- The width of the fabric must be at least 3 inches wider than the width measurement of the finished shade. If the fabric width is not wide enough, you will need to purchase twice the length amount.
- The length to purchase equals the finished shade length plus 10 inches.
- Lining – Purchase Roclon (54" wide) Drapery lining same amount as Decorator fabric.
- ½" or ¾" Brass/Plastic Rings -available at JoAnn fabrics drapery section. Purchase 2 pkges (48 rings)
